BALCONY, TERRACE AND BASEMENT CORNER STRAINER

Used in balconies with downspouts pass, they are used by combining with profiles from upper balcony to lower balcony. Corner balcony strainers don't cause unfavorable appearance of your building caused by classical strainers, due to additional external profiles

MDTS 801

Code of Product	Size (Diameter)	Description
MDTS 801	Ø 100 mm	Corner balcony strainers - Depth 55 mm
MDTS 802	Ø 70 mm	Corner balcony strainers - Depth 50 mm
MDTS 803	Ø 50 mm	Corner balcony strainers - Depth 37 mm

MDTS 802

Important Note: As this product exposed to temperature change in balconies, our corner balcony strainers have been produced of compounded raw materials. With their 15x15 upper surface width and 58mm reservoir depth, high water level has been obtained.
